

In DURBAN Precast we design, develop and manufacture urban furnishing. We are extremely passionate to be part of the re-thinking and re-shaping of urban spaces across the US and Latin America. Those spaces where families share and children grow. The parks where communities engage in recreational activities and we socially bond without regard of age, status or background. Citizens develop their daily life stories in these urban settings. It is a great responsibility to be a part of this construction of social fabric and we know we are up to the task to deliver with stellar quality products and services.

The diversity of our team allows us to address a wide range of spaces and deliver the best solutions that include concepts of urbanism and landscaping.

Among us you can find designers, architects and engineers passionate about urban furniture, allowing us to have an ample scope when evaluating processes and ideas on the construction of communal spaces.

Our designs are centered on being comfortable, durable and of high-quality.

Our commitment goes beyond manufacturing, we work pursuing the ultimate goal of contributing to public spaces that will ultimately be part of the growth of our cities.

## A B O U T

The company was founded as part of the Group Premoldeados de Argentina, a precast concrete company that has been thriving in the region for over 100 years.
