

Account User Tutorial

KerckhoffStone.com

Registering for an account on KerckhoffStone.com will give you easy access to technical documents for all our products as well as other information that will assist you in requesting quotes and receiving support.

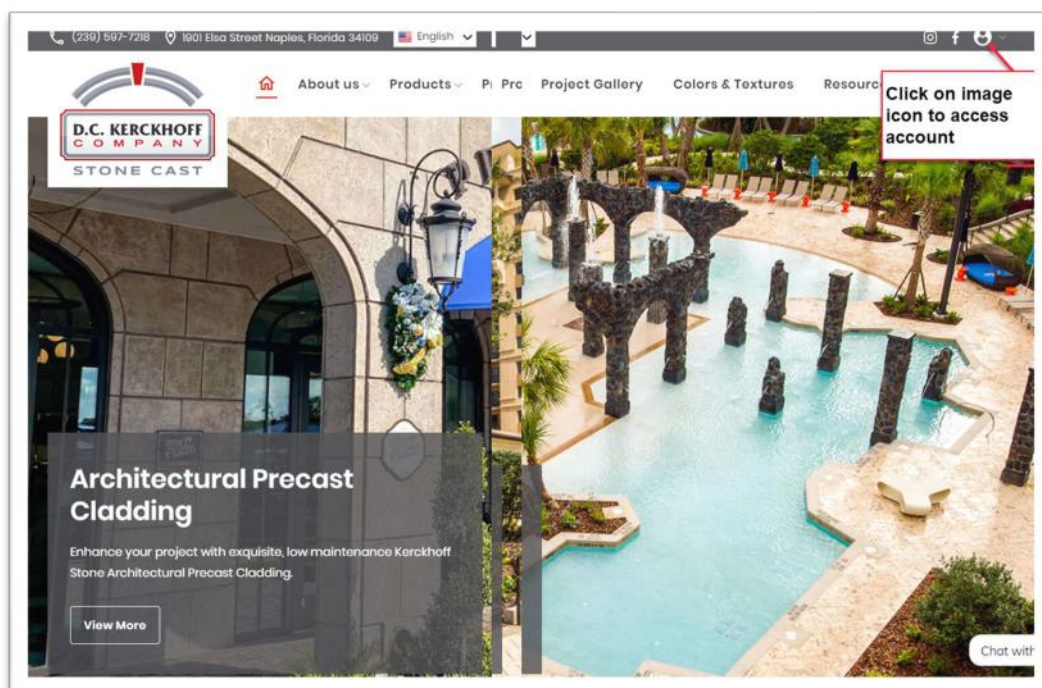

STEP 1: After completing your registration form, check your email and click the link to confirm and activate your account. Then login via the login button in the upper right of our site.

STEP 2: Browse products while logged in and download files of interest for your project. The product(s) associated with downloaded files will be stored and available in your account.

STEP 3: Visit your account area to manage your profile, view products, complete order forms, view completed orders (requests for quotes), and to request help.

Once logged in, your login button will be replaced with an image icon in the upper right of our site. Clicking this image will give you access to your unique account.

Within your account, you will land on your profile that you may modify if desired. Be sure to click the update and save button when making changes.

Linear Pavers

For the modern, running bond application at pool decks or driveways, Kerckhoffstone Linear Pavers can be set in either sand or in a mortar bed. Large Linear Pavers are available in all Kerckhoffstone colors and both Keystone or Acid wash textures. Narrow linear pavers, perfect for Driveways, Turnarounds and Pathways, are available in vehicular rated thicknesses. Whether for a pool deck in a running bond pattern or a walkway for a hotel or residence, Kerckhoffstone Linear Pavers add a timeless look to any Hardscape.

Photos

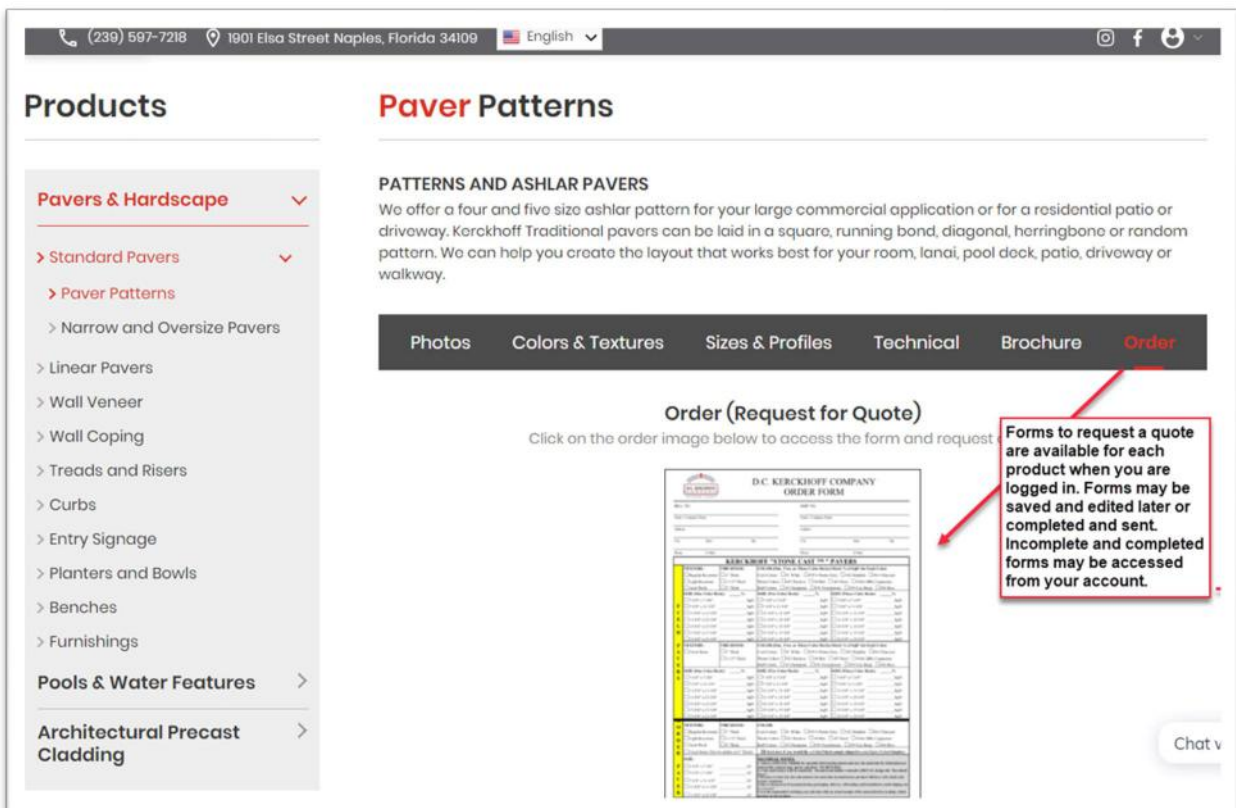

Click on the images below to view a larger display.

The first photo shows a pool deck with Linear Pavers in a running bond pattern. The second photo shows a driveway with Linear Pavers. The third photo shows a walkway with Linear Pavers next to a lawn.

Downloading technical files will automatically add the associated product to your account under products. Clicking on the product image will redirect you back to the technical files for that product.

Within every product is an order form specific for that category of products. While logged in, click the order tab to access an easy to complete online form for requesting a quote. Clicking the form image will produce a fillable form that may be saved and completed later or submitted.

Coral Stone (Not Available In 2" Thick)

11 - 5/8" X 11 - 5/8" LF

11 - 5/8" X 23 - 5/8" LF

Check Here If You Would Like A Color/Finish Sample Shipped To You (Up To 3, 6x6 Samples)

Material Notes

1. This is a SPECIAL ORDER for specially fabricated products and once the materials for fabrication are ordered the contract may not be cancelled - NO RETURNS.
2. Color and texture is DCK standards. Abrasion and mildew resistant 6,500 P.S.I. design mix "Kerckhoff Stone"
3. Because of color dye lots and natural raw materials inconsistencies, product will have color shade and texture variations.
4. Due to the process of manufacturing, packaging, delivery, off-loading and installation, small chipping can be expected.
5. It is recommended verifying your selection with an actual sample of the material before making a final decision on the product.

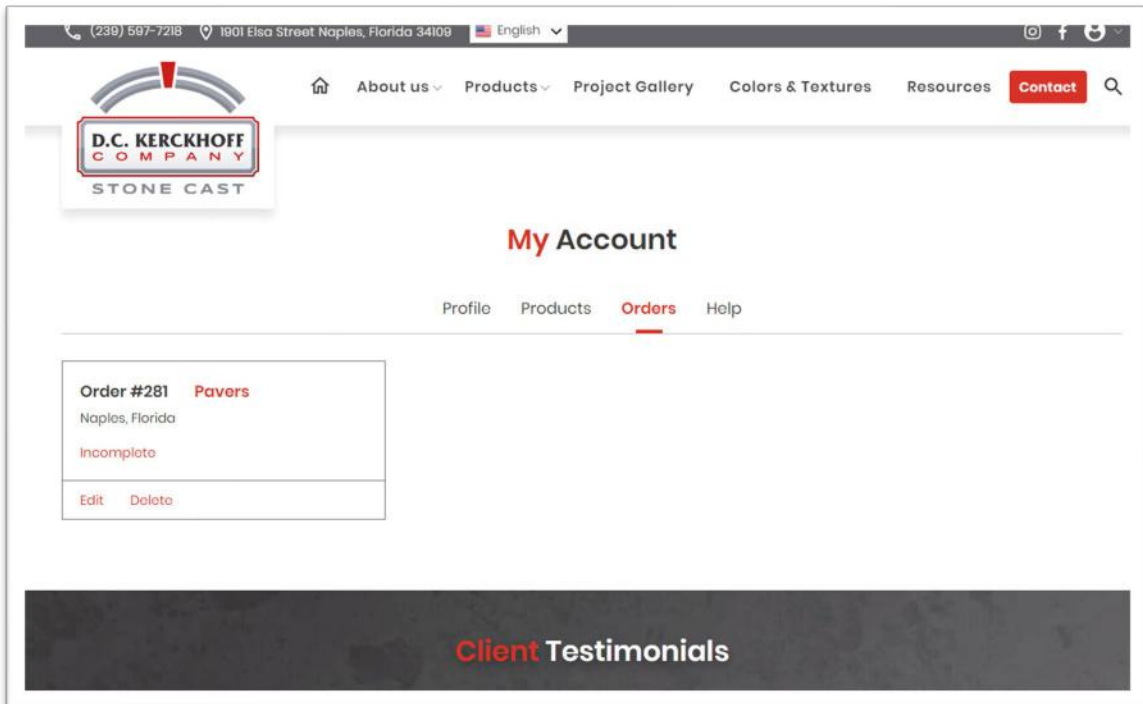

[Save](#) [SUBMIT](#)

Save to edit and submit later. Submit when completed.

Your order (request for quote) has been saved. View, edit and complete order in your account.

Chat with us

Complete your saved order form within your account. Also view all your incomplete and completed order forms under the tab called orders.

If you have questions or need assistance, we are happy to help. Within your account is a help tab where you have the option to check a box by any of the products you have saved and complete a short form that we will promptly answer.
